An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Ms. Hazzard on 7/28/03.

In claim 1 after line 3 after "portion" --within the housing--has been added.

In claim 27 line 4 after "portion" --within the housing--has been added.

In claim 30 line 2 after "end" --and a hollow portion within the housing--has been added, in line 4 "housing" has been changed to --hollow portion of the housing--has been added, in line "coaxial" has been changed to --in a coaxial relationship--, in line 9 "housing" has been changed to --hollow portion of the housing--.

The Office approached Applicant and stated if the above amendments were made the application would define over Bachand et al. These amendments have overcome Bachand et al. and the rejection has been vacated. However, upon updating the search, the following new reference was found and will be applied below.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States

Art Unit: 1743

only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-30 are rejected under 35 U.S.C. 102(e) as being clearly anticipated by Cesarczyk et al. (USP 6,150,178).

Cesarczyk et al. teach a method and device for sample collection comprising an elongated handle having an absorbent foam member that is slidably receivable in a housing. The housing contains a test membrane capable of detecting analytes of interest in the sample. The housing is of a diameter smaller than the housing such that when the handle is pulled through the sample is expressed from the foam member and contacts the membrane.
